Summary

Software Engineer and Computer Science undergraduate with hands-on technical experience in full-stack web development, AWS cloud infrastructure, and DevOps deployment pipelines. Demonstrated track record in building cross-platform user interfaces with the MERN stack, managing automated CI/CD workflows on AWS, and applying analytical models to data retrieval workflows. Proven ability to deliver production-grade software modules within modern enterprise engineering environments.

Technical Skills

Languages: Python, JavaScript, HTML5, CSS3

Web Development: React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, Responsive UI Design

Cloud and DevOps: AWS EC2, AWS S3, AWS IAM, AWS CloudWatch, AWS CodeBuild, AWS CodeDeploy, AWS Lambda

Data and AI: Deep Learning, Information Retrieval, Knowledge Engineering, MongoDB

Tools and Platforms: Microsoft 365 Copilot, Git, OpenFrameworks

Experience

Software Engineer – Compozent, Mumbai, India

June 2026 – Present

- Engineer and optimize production-ready software features, delivering 10+ enterprise-level software components in an Agile environment and improving feature release speed by 20%.
- Execute cross-functional technical specifications to deploy production modules, serving 5,000+ simulated end-user interactions with 99% uptime.
- Maintain structural engineering environments by upgrading web interfaces, resulting in a 15% improvement in performance.

DevOps Specialist – Compozent, Mumbai, India

December 2024 – January 2025

- Provisioned configuration management architectures on AWS EC2, AWS S3, AWS IAM, and AWS VPC to deploy 12 scalable web application instances.
- Streamlined deployment velocity by configuring automated CI/CD delivery pipelines using AWS CodePipeline, AWS CodeBuild, and AWS CodeDeploy, reducing build processing intervals by 25%.
- Monitored infrastructure health and application logs using AWS CloudWatch to ensure high availability across deployed instances.

Projects

Rentify – Multi Category Rental Platform – React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary

- Built an online rental marketplace enabling users to rent or list products with end-to-end booking management and secure authentication.
- Implemented core features including Authentication, Product Listings, Booking System, Search and Filters, Wishlist, Reviews, Owner Dashboard, Admin Panel, and Image Upload.
- Handled full MERN development, designed REST APIs, structured the MongoDB database, and implemented JWT-based authentication.

Canteen Grab and Go – MongoDB, Express.js, React.js, Node.js (Live Demo)

- Programmed a transactional full-stack order-handling application featuring algorithmic token allocation, reducing average user waiting times by 35%.
- Architected multi-role administrative frameworks managing live payment integrations, data tables, and dynamic tracking states for scalable performance.

Publications

A. Shukla, P. Vishwakarma, B. Singh, H. Thakur, R. Rathod, "Design and Implementation of Canteen Order Management System," Research and Reviews: Electronics and Communication Engineering, vol. 3, no. 2, pp. 47-57, Jun. 2026. [View Publication](#)

Education

Bachelor of Engineering (BE), Electronic and Computer Science – Shree L. R. Tiwari College of Engineering, University of Mumbai, Mumbai, India

Aug 2023 – May 2027 (Expected)

CGPA: 7.0 / 10

Leadership and Extracurricular

R&D Cell – Admin Co-Head – Shree L. R. Tiwari College of Engineering, Mumbai, India

2025 – 2026

- Directed operational tasks and structural frameworks for 5 departmental technological presentation initiatives.
- Moderated communication channels between student researchers and senior faculty to oversee ongoing technical milestones.

Certifications

Everyday AI Concepts; Learning Microsoft 365 Copilot for Work; MongoDB Overview: Core Concepts and Architecture; IEEE TechnoKnockdown-2025 (TKD-26) – Paper Presentation; Certificate of Participation, Main Quiz (QuizOff 2026 by CampusCrew)
